

Dr. Schutz®

A woman and two children are sitting on a light-colored floor, looking at something on the floor. The woman is in the center, wearing a white tank top and light green pants. To her left is a young boy in a yellow and blue jacket. To her right is a young girl in a yellow jacket and white pants. They are all looking down at the floor. The background shows a large window with a view of a city and greenery.

FLOOR COVERINGS WHICH REMAIN LOVELY

Dr. Schutz – the name means long-term protection, easy application and especially long enjoyment of your own floor.

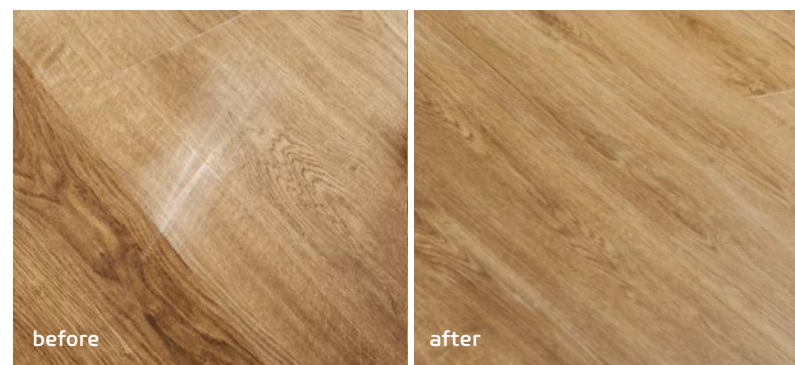

THE BEST CARE FOR RESILIENT FLOOR COVERINGS

Perfectly adapted to your floors

The noble appearance of elegant linoleum, Design floors or CV and LVT floors contribute to a special spatial experience, which can last a long time - with the right care. For this purpose Dr. Schutz offers the optimal products, which are carefully coordinated with each other and with the most diverse floor coverings, and thus meet every requirement. Starting with stripping the floor, through refreshing it and removing stains.

PU Cleaner/Schutz Cleaner is suitable for regular cleaning. Ideal for floor coverings which have been treated with **PU Sealer/Waxnomor**, or have a factory-applied PU surface coating. Use **Floor Matt** to refresh worn surfaces. The **Design Floor Care Kit** combines both these and also includes a white hand-pad for the removal of heel marks, as well as cleaning and care instructions according to German norm DIN 18365. For glossy floors the **Floor Shine** version is available. What is more, **Floor Matt/ Floor Shine** are both suitable for renovating the care film in a high speed process.

MAINTENANCE MADE EASY

Optimal care for a lovely home

Especially high quality trendy coverings and Design floors with stone or wood appearance need special care – as protection against scratches and mechanical wear. Optimal cleaning and care products effectively prevent damage – so that the floor remains as you would like to see it: permanently lovely.

Floor Cleaner R 1000 combines cleaning and care and creates a non-slip, dirt-repellant and anti-static care-film with a satin-matt appearance. Can be polished and is suitable for initial care, for sports floors according to German norm DIN 18032 and for cleaning machines. **Elatex Universal Stain Remover** is the little miracle against all forms of water soluble and water insoluble stains.

THE BEST CARE FOR SYNTHETIC WALL-TO-WALL CARPETS

Hygienically clean, soft and attractive looking

These are the features of a well-cared for carpet. With Dr. Schutz the enjoyment of your floor is guaranteed: because Dr. Schutz products provide the right solution for every problem.

Carpetlife Granulate dissolves dirt thoroughly and quickly, maintains the depth of colour and freshness of the flooring and prevents increased new dirt accumulating. Without shrinkage, waves or dampness, so that the flooring can be walked on even during the cleaning process. **Fresh Up 2 in 1** absorbs bad smells completely out of the fabric and at the same time dissolves stains and marks – for fresh air in the room and hygienically visible cleanliness. Ideal for pre-treatment, enhanced or intensive cleaning with a fibre pad. **Floor Mate+** removes water soluble and insoluble stains with active oxygen – even intensive coloured stains such as red wine, coffee or tea.

FOR JOY IN YOUR OWN HOME

Warmth and comfort due to lovely wall-to-wall carpets

For the intensive cleaning of stubborn stains, and against greying, the accumulation of new dirt, bad smells and tangling, cleaning machines from Dr. Schutz can be hired from specialist retailers.

Concentrated Carpet Cleaner cleans deep into the fibres and protects against the increased accumulation of new dirt. The Fresh Up formula provides better air in the room. **Baygard Carpet Protection Spray** has a repellent lotus-effect and stabilizes the fibres, thus preventing greying and tangling. Endurance against vacuum-cleaning and mechanical influences gives protection for up to three years. **Stain Guard** envelops the fibres with a long-term protective film. Fluids roll off and can easily be dabbed away. Ideal for floors without a factory-applied protective coating, as well as for refreshing after wet cleaning.

THE BEST CARE FOR NATURAL WALL-TO-WALL CARPETS

The right treatment; right from the start

Sisal, coconut fibres, jute, new wool – these natural floors are very sensitive to moisture and require special care. Once they are wrongly treated, then the resulting damage is irreparable – and what used to be their lively appearance soon looks unsightly. The special products from Dr. Schutz make sure that the treatment of individual stains, as well as entire areas, is gentle to the colors and fibres.

Alibaba Stain Remover removes water soluble stains, is especially gentle to colours and fibres, and prevents the accumulation of new dirt. **Dry foam** is especially suitable for effective, but at the same time very gentle cleaning. Special anti-soiling components reduce the accumulation of new dirt on the shampooed surface.

CLEANING LIKE PROFESSIONALS – WITHOUT BUYING THE CLEANING MACHINE

Hiring from your specialist retailer

We recommend intensive cleaning with Dr. Schutz care products at regular intervals, which very efficiently removes dirt. Depending on the type of floor, cleaning can be carried out in a wet or dry process. The Dr. Schutz cleaning machines needed for this can be conveniently hired from your specialist retailer.

Multi Clean 350, with two counter-rotating brushes, massages Carpetlife Granulate into the pile and draws it up again after cleaning — for an optimal cleaning effect.

SprayBoy 2000 sprays the cleaning solution deep into the pile, dissolves the dirt and then vacuums it up. Also perfect for cleaning upholstery, vacuuming up cleaning solutions on hard floors, or it can be used as a classic dry vacuum-cleaner.

Floor Boy cleans and polishes all resilient floors — its oscillating movements make it easy and effortless to handle.
